Why Choose SR²Food?

SR²Software brings over 35 years of software development experience and a passionate commitment to the food industry. Our team has invested countless hours and resources to understanding the day-to-day processes, functions, and operations that keep the food distribution industry ticking.

Backed by our IBM partnership, we can supply the IBM servers you need to drive your SR²Food product – and your business.

Extensive & Customizable Solutions At a Price You Can Afford

Core System Benefits

At the best price, with many Core Features, we are able to provide a system that keeps-up with your daily demands.

SR²Food helps you:

- Reduce the time it takes to enter, pick, and ship an order
- Reduce the time it takes to determine items and quantities you need to fill orders or replenish inventory
- Increase productivity in all areas of your operation
- Achieve total traceability
- Improve Customer Service
- Gain cost-effective regulatory compliance
- Eliminate costly personnel errors
- Seamlessly intergrate to QuickBooks for accounting purposes

Along with the Core System, SR²Food offers modular extensions that will enable you to attain additional capabilities for your distribution operation.

- **Lot Control** The flexibility of SR²Food covers tracking inventory from lot source or lot destination, for one or multiple warehouses.
- **Barcoding** With SR²Food's barcoding module, you no longer have to endure costly and time-consuming manual recording errors for shipping and receiving.
- **B2B e-Commerce** The SR²Food B2B e-Commerce brings web-based ordering, tracking and monitoring capabilities to your customers via the web.
- **Manufacturing** For food manufacturers, the manufacturing module supplies ERP functionality without the costly bells and whistles.
- **Accounting Integration** SR²Food features a seamless connection to QuickBooks® –the leading accounting software solution on the market.
